REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The closest prior art Sandstrom et al and Sarma et al taken as a whole fail to teach a single paperboard material which has an apparent density between 6 and 10 lb/3MSF/mil, a caliper of 24 to 35 mil, an average internal bond of 0.08 ft-lbf, from 5 to 10 weight percent polymer microspheres, and a Sheffield smoothness greater than 300 SU. Although Sandstrom et al teaches ranges that overlap the density and caliper ranges claimed, when one value is optimized another value falls out of range. Therefore, the combination of the five properties of the paperboard material renders the container or cup patentable over the closest prior art.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P Bruenjes whose telephone number is 571-272-1489.
